

EDUCATION

Western Colorado University — Gunnison, CO
B.S. Computer Science (Information Security Emphasis)
CompTIA Security+

*EST May 2027 | Major GPA (3.7)
Issued: Feb 2026 | Expires: Feb 2029*

EXPERIENCE

IT Infrastructure Intern — Union Home Mortgage Corp.

May 2026 - Current

- Supported enterprise IT infrastructure for 2200+ employees.
- Automated daily employee headcount reporting to enhance physical security monitoring and efficiency.
- Performed physical security assessments of surveillance systems, badge access controls, and server rooms, documenting findings and recommending improvements.
- Developed technical documentation for enterprise AI applications, ensuring consistent configuration and secure usage for 7 LLMs settings company wide.
- Participated in a live blind penetration test, analyzing Datadog, our SIEM, Microsoft Exchange and CrowdStrike to catch the fake threat.
- Used AWS Systems Manager to clean up vulnerable software from 120+ servers.
- Created pipelines in Azure DevOps to Automate the deployment of new applications.

Jr Security Engineer Intern — On Technology Partners

Sept 2025 – Dec 2025

- Helped small businesses reach CMMC (Cybersecurity Maturity Model Certification).
- Contributed to improving our clients security posture by configuring documentation and security settings for the following topics, access control, physical protection, risk management, incident response and identification and authentication.
- Assisted in developing organizational policy and procedures as well as gathering evidence to prove CMMC compliance.

Information Technology Service Desk Intern — Union Home Mortgage Corp.

May 2025 – Aug 2025

- Resolved technical issues for 2200+ employees.
- Worked in HALO ITSM to answer tickets and chats.
- Managed ticket queues and response times in order to meet set SLA deadlines.
- Troubleshoot hardware, software, and user access issues.
- Assisted in improving KBAs (Knowledge Base articles), documentation to help solve repeat problems.

PROJECTS

- Configured Wazuh SIEM for centralized log monitoring on my personal endpoints.
- Created a vulnerable server for other people to practice pen testing and developed attack narratives.
- Programmed a notepad application that uses AES 128 to encrypt data to provide confidentiality.
- Practiced penetration testing through TryHackMe and Hack The Box.

SKILLS

- Cybersecurity: Penetration Testing, Vulnerability Assessment, SIEM, Incident Response, Threat Detection, Network Security, Endpoint Security, IAM, Risk Assessment, Security Auditing, GRC
- Security Tools: CrowdStrike, Datadog, Wazuh, AWS Systems Manager, Azure DevOps, Wireshark, Tenable, Varonis, Nmap, Gobuster, Metasploit, Docker, VirtualBox, Linux, Windows Server, AD, Bash
- Programming Languages: C, C++, Python, PowerShell, SQL, JavaScript, HTML, CSS
